

REMARKS

Reconsideration of this application, as amended, is respectfully requested.

Claim 8 has been amended to incorporate the subject matter of claim 11, which was found to be allowable over the cited art of record. The remaining independent claims, 1, 6, 14, 19, 21, 22, 23, and 28 have also been amended to incorporate the subject matter of former claim 11. Specifically, as amended, the independent claims each require a server object, which receives a request from the consolidator module; a request handler, connected to the server object; and an implementation object which receives the request from the request handler. Notwithstanding the previous rejections In light of Haseltine, the Decision on Appeal agreed that no reason why one of ordinary skill would use such tools as enumerated in these claims or that there use was predictable has been articulated. Accordingly, all of the present claims should be deemed allowable over the cited art of record for at least the reasons set forth in the Decision on Appeal.

If there are any additional fees due in connection with this communication, please charge Deposit Account No. 19-3140.
